## CGS U.S. ISIN Basic Service

### ➤ Service Overview

The CGS U.S. ISIN Basic Service was developed to meet the needs of market participants in the European Economic Area that require access to certain U.S. ISINs and a minimal amount of related descriptive data (as compared to the more robust CGS data feeds). The Service contains over 2 million ISINs for certain publicly traded U.S. securities that were assigned by CUSIP Global Services (CGS) in its role as the U.S. National Numbering Agency.
